

CORDED HAIR CLIPPER INSTRUCTION MANUAL

TT-615

TT-614
TT-624

Dear consumer, Please read these instructions carefully before use in order to avoid damage due to incorrect use and to better understand the functions of this product. Please pay particular attention to the safety guide.

If you pass the device on to a third party, these Operating Instructions must also be handed over.

Please keep them for future references.

IMPORTANT SAFEGUARDS

- Please read these instructions carefully before use.
- Keep present instructions for future references.
- Check that your mains voltage corresponds to that stated on the appliance.
- Only use the appliance for domestic purposes and household or similar applications such as:
 - staff kitchen areas, in shops, offices and other working environments;
 - By clients in hotels, motels and other residential type environments;
 - Environment type like :
 - Farm Houses • Bed and Breakfast.
- Only use the appliance in the way indicated in these instructions.
- Never use this unit near bathtub, shower, wash-hand basins or other containers with water.
- Never use this apparatus near water projections.
- Never use this apparatus with the wet hands.
- If, unfortunately the apparatus is wet, immediately withdraw the cord of the socket-outlet.
- Inform potential users of these instructions.
- Never leave the appliance unsupervised when in use.
- The appliance must be used only for its intended purpose. No responsibility can be taken for any possible damage caused by incorrect use or improper handling.
- Children and persons with disabilities are not always aware of the danger posed by the use of appliances.
- The appliance can be used by children aged from 3 years under supervision.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or

mental capabilities, or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.

- ❑ Children shall not play with the appliance.
- ❑ Cleaning and user maintenance shall not be made by children without supervision.
- ❑ In order to ensure your children's safety, please keep all packaging (plastic bags, boxes, polystyrene etc.) out of their reach.
- ❑ Caution ! Do not allow small children to play with the foil :
THERE IS A DANGER OF SUFFOCATION !
- ❑ From time to time check the cord for damages. Never use the appliance if cord or appliance shows any signs of damage.
- ❑ Never immerse the appliance in water or any other liquid for any reason whatsoever.
- ❑ Never place it into the dishwasher.
- ❑ Never use the appliance near hot surfaces.
- ❑ Do not operate the appliance with a damaged cord or plug, or after the appliance has been damaged in any manner.
- ❑ If the supply cord or appliance is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
- ❑ Disconnect the power source cable before any operation of cleaning of maintenance and accessories assembly.
- ❑ WARNING: Keep the appliance dry.
- ❑ Never use accessories, which are not recommended by the producer. They could constitute a danger to the user and risk to damage the appliance.
- ❑ Never use any other connector than the one provided.
- ❑ Never move the appliance by pulling the cord. Make sure the cord cannot get caught in any way.
- ❑ Never wind the cord around the appliance and do not bend it

- ❑ Ensure that the power cord does not come into contact with hot parts of this unit.
- ❑ Make sure the appliance has cooled down before cleaning and storing it.
- ❑ The temperature of accessible surfaces may be very high when the appliance is operating. Never touch these parts, of apparatus, to avoid burning itself.
- ❑ Make sure the appliance never comes into contact with flammable materials, such as curtains, cloth, etc...& the power cord and plug do not come in contact with water.
- ❑ Before cleaning, always unplug the appliance from the power supply and let it cool down.
- ❑ This appliance is not intended to be operated by means of an external timer or separate remote-control system.
- ❑ Always place the unit on a flat surface. Ensure, also, not to cover the device and not to put anything on it.
- ❑ Always remove the plug from the wall socket when the appliance is not in use.
- ❑ When using an extension lead always make sure that the entire cable is unwound from the reel. Use solely CE approved extension leads. Input power must be at least 16A, 250V, 3000W.
- ❑ Incorrect operation and improper use can damage the appliance and cause injury to the user.
- ❑ This device, designed for home use, complies with standards relating to this type of product.
- ❑ The appliance must be used and rested on a table or flat & stable surface.
- ❑ The item must not be left unattended when it is connected to main supply.
- ❑ The item is not to be used, if it has been dropped or if there are visible signs of damage or if it is leaking.

- Regarding the instructions for cleaning, thanks to refer to the below paragraph of the manual.
- This appliance is only intended for household use.

GENERAL INFORMATION

The symbol "OPEN BOOK" means a recommendation to read important things contained in the record.

The symbol "BIN" crossed out, abbreviation WEEE (Waste of Electrical and Electronic Equipment) means that at the end of life, it should not be discarded with household waste, but filed to the sorting of the locality. Waste recovery can help preserve our environment.

The symbol "CE" is the guarantee of compliance with harmonized European standards, voluntary, reflecting the essential requirements into technical specifications. These standards are not mandatory but are guarantees of compliance with essential requirements.

The symbol ROHS (Restriction of use of some Hazardous Substances) on the Environmental Protection, certifies that for each of the five hazardous substances • Lead • Mercury • (hexavalent) chromium • products for protection against flames PBB and PBDE, the peak concentration is equal to or less than 0.1% of the weight of homogeneous material, and 0.01% for the 6th • cadmium.

The symbol "DOUBLE SQUARE" means a double insulated. A basic insulation and supplementary insulation. This device requires no connection to the mass of a protective conductor grounded. The materials are said : double insulation class II.

The symbol "TRIMAN" indicates that the consumer is invited to dispose the product as part of a separate collection (eg recycling bin, waste, voluntary intake point).

PARTICULAR WARNING FOR PRODUCT USE IN A BATHROOM

- Switch off when not in use, even if for a moment.
- Unplug it after use, since the proximity of water presents a hazard, even when the unit is switched off.
- Do not use this product while taking a shower or bath. Always unplug the device even close between 2 uses.
- When the unit is used in a bathroom unplug it after use since the proximity of water presents a risk, even when the power is off.
- To provide additional protection, in the electrical circuit supplying the bathroom, a residual current device (RCD) with a rated residual current not exceeding 30mA operation, is recommended. Consult your installer.

NOTE: A thermal fuse, is not a residual current device (RCD).

- Do not use this product while taking a shower or bath.
- Always unplug the unit itself between two closely spaced uses.
- For example: Stop the machine and unplug it if you drop it while you dry.

BEFORE YOU BEGIN

- Make sure that your clipper is clean, properly oiled and perfect working condition.

- Place a towel around the neck of the person to prevent hair from falling down inside the collar.
- Position the person whose hair is to be cut on a chair so that his/her head is at your eye's level.
- Comb the hair to remove all tangles, hold the clipper in a relaxed comfortable grip. This will help you to maintain an accurate cutting control.

TO KNOW ITS UNIT

GUIDE FOR CUTTING HAIR AT HOME

Never use the product to cut wet hair, It is designed to work in dry condition only.

CUTTING HAIR WITH THE ATTACHMENT COMBS

For medium to long cut

- To attach combs, hold comb with teeth up, snap comb attachment firmly to the bottom of the clipper blade,
- Attachment comb #1 --- leaves hair approx. 1/8" 3mm Blending in length
- Attachment comb #2 --- leaves hair approx. 1/4" 6 mm in length
- Attachment comb #3 --- leaves hair approx. 3/8" 9mm in length
- Attachment comb #4 --- leaves hair approx. 1/2" 12mm in length
- Special angle comb is available.
- At the beginning, cut only a small amount of hair until you become accustomed to the length each attachment comb leaves the hair.
- It is suggested to try the longest attachment comb on the clipper first, then use the shorter one if the desired length is shorter.
- For uniform cutting, never push or force the clipper through the hair at a fast rate. The clipper works most efficiently when it works at its own speed.
- Start by combing the hair in its natural direction,

- Place the largest, attachment comb onto your clipper and start by trimming the sides from the bottom upwards.
- Hold the clipper lightly against the hair with teeth of the attachment comb pointing up but flat against the head.
- Slowly lift the clipper up and outward through the hair, cutting only a small amount at a time.(Fig. 1)
- Repeat around sides and back of head.(Fig.2)
- If you desire shorter hair, either change to a lower number attachment comb or apply more pressure and less lift away from head with the present attachment comb.
- This entire procedure requires practice, and it is always better to leave too much hair the first few haircuts.(Fig.3)
- For the top of the head, you will give a fairly short cut if you use the #4 attachment comb. With the teeth flat against the head, slowly start trimming from the front to the back. Again, it is better to leave the hair longer the first few haircuts.(Fig.4)

Fig.1

Fig.2

Fig.3

Fig.4

Outlining

- Outlining requires no attachment. Take the clipper and push the lever up to the close-cut position.
- Comb hair into the style. Position clipper between the side burns and the ear.(Fig. 5)
- Make sure the corner edge of the blade is against the hairline. With the outline of the hair as your guide, slowly move the clipper over, around, and behind the ears.(Fig.6)
- For the back of the neck and the sideburns, hold the clipper upside down, (see sketch), and holding it against the skin at the length desired, move downwards.

Fig.5

Fig.6

Short cuts to perfect flat tops, crew cuts

- Always cut from the back of the neck to the crown, using the longest attachment comb. Holding it flat against the head, slowly move the clipper up through the hair.
- Use the same technique for the sides, cutting from the bottom to the upper side of the head. (Fig.7)
- For the front to the crown, cut the hair against the direction in which it grows. Then even it up with the sides.(Fig.8)
- For a flat top, use a flat comb, not the attachment comb. Just cut hair on top of the head over it.

Fig.7

Fig.8

Fig.9

- To taper hair down to the neckline, use closer cutting attachment combs. Comb hair and check for uneven spots and outline sideburns and neckline.(Fig.9)

If a short-tapered cut on the sides and back is desired, follow the diagram below:

The four basic areas illustrated on the hair cutting guide are your "road map" to easy do-it-yourself hair cutting.

MAINTENANCE

- Your clippers were carefully examined to ensure that the blades were oiled and aligned before leaving our factory.
- Blades must be realigned if they have been removed for cleaning or replacement.
- To realign the blades, simply match the upper and bottom blades teeth up, point for point.
- (End of top blade teeth) should be approximately 1.2mm back from bottom blade.
- Compare your clipper blades with the sketch)
- If blade alignment is incorrect, add a few drops of oil to the blades, turn clipper on for a few moments, turn off and unplug. Loosen screws slightly and adjust. Tighten screws after blade is aligned.

OIL

- To maintain your clipper in peak condition, the blades should be oiled every few haircuts.
- Do not use hair oil, grease, oil mixed with kerosene or any solvent. As the solvent will evaporate and leave the thick oil which may slow down the blades motion.

ADJUSTABLE LEVER

- The lever is conveniently located near your thumb (if you're right handed) so it can easily be adjusted while the clipper is in your hand.
- The lever adds versatility to your clipper by allowing you to gradually change the closeness of your cut without an attachment comb.

- When the lever is in the uppermost position, the blades will give you the closest cut and leave the hair very short. Pushing the lever downward gradually increases the cutting length.
- In its lowest position, the lever will leave the hair approximately the same length as a #1 comb.
- The lever will also extend the use of your blades since a different cutting edge is used in each setting.
- In addition, if extremely heavy hair cutting has jammed the blades, it will help you remove hair that has become wedged between the two blades without removing the blades.
- While the clipper is running, rapidly move the lever from "close cut" to "longer cut" a couple of times. Doing this each time after you have finished using your clipper will help to keep the blades clear of cut hair.
- If your clipper stops cutting and this does not help, your cutting blade are dulled. Replace them with new blades.

CLEANING AND MAINTENANCE

Before cleaning switch the device off with the on/off switch.

Turn the shearing head to the left to loosen it and then pull it out. Pull out the shearing blade with caution. Warning: the cutting blade is sharp! DANGER OF INJURY!

Brush the shearing head and clamp in a star-shaped manner. Remove even the smallest bits of hair by blowing.

Mount the shearing head back on the drive shaft of the device and screw it on by turning to the right.

After cleaning insert the cleaning brush back into the holder.

Push the protection cap back on the shearing head.

Before cleaning switch off the appliance

Always disconnect the apparatus and to let it cool before cleaning.

Clean the outside of the apparatus with a sponge or slightly wet linen.

Never plunge the apparatus in water or all other liquid!

Do not use abrasive cleaners, gritting, or metal brush or another cutting object.

operating current not exceeding 30 mA is advisable in the electrical circuit supplying the bathroom. Ask your installer for advice.

Always unplug the appliance before any cleaning or maintenance operation and accessories assembly.

CAUTION: If the electric cable is damaged, it must be replaced by the manufacturer, his after-sales service or people with similar qualification, in order to avoid any danger. In order to minimize the risks of electric shock, In the event of breakdown, not to open the case but to call upon a qualified technician for repairs.

This apparatus satisfied EC directives, it was controlled according to all the European current directives, like: electromagnetic compatibility (EMC) and low tension (LVD). This apparatus was designed and manufactured in respect of the last safety regulations and technical specifications.

STORAGE

- Ensure the unit is completely cool and dry.
- Do not wrap the cord around the appliance, as this will cause damage.
- Keep the appliance in a cool, dry place.

GUARANTEE

Before being delivered, all our products are subjected to a rigorous control. This apparatus is guaranteed 24 months starting from the date of purchase of consumer.

The documents in proof of guarantee are :

- The invoice and
- The filled and stamped warrantee plate (located on side or bottom of the gift box). Without these documents in proof, no free replacement, nor no free repair, can be carried out.

During the warranty period, we deal for free, the defects of the apparatus or the accessories, rising from a defect of materials or manufacture by repair or, replacement. The services within the framework of the guarantee do not involve any extension of the warranty period and does not give right to a new guarantee ! In the event of recourse to the guarantee, bring back the complete apparatus to your retailer, in its original packing, accompanied by the proofs of purchase.

The breakage of parts out of glass or plastic is, in all the cases, not warranted. Defects on the accessories or the wearing parts (for example: coals of engines, hooks, drive belts, remote control of replacement, teeth brushes of replacement, webs etc) as well as cleaning, maintenance or it replacement of wearing parts are not guaranteed and are thus to pay !

In the event of foreign intervention, the guarantee becomes null and void.

After flow of the warranty period, repairs can be carried out, against payment, by a specialized trade or a repair service.

SPECIFICATIONS

Power supply	230V~ 50Hz
Power	10W
Norm	Class II

The characteristics can change without prior notice.

WARNING FOR PARTICULAR PRODUCT USED IN A BATHROOM

To provide additional protection, the installation, in the electrical circuit supplying the bathroom, of residual current device (RCD) of rated residual operating current, not exceeding 30mA, is recommended. Ask your installer for advice.

NOTE: A circuit breaker is not a residual current device (RCD).

CAUTION: In order to minimize the risks of electric shock, In the event of breakdown, not to open the case but to call upon a qualified technician for repairs.

This device complies with EC directives, it was controlled according to all current European directives, applicable such as: electromagnetic compatibility (EMC) and low voltage (LVD).

This device has been designed and manufactured in compliance with the latest regulations and technical requirements for safety.
